

~~52~~²¹. The method according to claim ~~29~~¹⁵, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.--

~~53~~²². The method according to claim ~~29~~¹⁵, wherein the fastening part includes an adhesive material.--

~~54~~²³. The method according to claim ~~29~~¹⁵, wherein the liquid crystal display device is immovable within the housing and the fastening part includes a screw passing through at least one hole in at least one of the first and second frames.--

~~55~~²⁴. The method according to claim ~~54~~²³, wherein the fastening part includes a second screw passing through a second hole in at least one of the first and second frames at a same side.--

~~56~~²⁹. The method according to claim ~~33~~²⁵, wherein the liquid crystal device is immovable within the housing.--

~~57~~³⁰. The method according to claim ~~56~~²⁹, wherein the fastening part includes a screw passing through at least one hole. --

~~58~~³¹. The method according to claim ~~33~~²⁵, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of the frame.--

~~59~~³². The method according to claim ~~33~~²⁵, wherein the fastening part includes an adhesive material.--

~~60~~³³. The method according to claim ~~33~~²⁵, wherein the liquid crystal display device is immovable within the housing and the fastening part includes a screw passing through at least one hole in the frame.--

³⁴
--61. The method according to claim ³³60, wherein the fastening part includes a second screw passing through a second hole in the frame at a same side.--

³⁹
--62. The method according to claim ³⁵37, wherein the liquid crystal display device is immovable within the housing.--

⁴⁰
--63. The method according to claim ³⁹62, wherein the fastening part includes a screw passing through at least one hole. --

⁴¹
--64. The method according to claim ³⁵37, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.--

⁴²
--65. The method according to claim ³⁵37, wherein the fastening part includes an adhesive material.--

⁴³
--66. The method according to claim ³⁵37, wherein the liquid crystal display device is immovable within the housing and the fastening part includes a screw passing through at least one hole in at least one of the first and second frames.--

⁴⁴
--67. The method according to claim ⁴³66, wherein the fastening part includes a second screw passing through a second hole in the at least one of the first and second frames at a same side.--

⁴⁵
--68. The method according to claim ⁴⁵41, wherein the liquid crystal display device is immovable within the cover.--

⁴⁹
--69. The method according to claim ⁴⁸68, wherein the fastening part includes a screw passing through at least one hole. --

⁵⁰
--70. The method according to claim ⁴⁵41, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.--

⁵¹
--71. The method according to claim ⁴⁵41, wherein the fastening part includes an adhesive material.--

⁵²
--72. The method according to claim ⁴⁵41, wherein the liquid crystal display device is immovable within the cover and the fastening part includes a screw passing through at least one hole in at least one of the first and second frames.--

⁵³
--73. The method according to claim ⁵²72, wherein the fastening part includes a second screw passing through a second hole in the at least one of the first and second frames at a same side.--

⁵⁴
--74. The method according to claim ⁵⁴44, wherein the liquid crystal display device is immovable within the cover.--

⁶¹
--75. The method according to claim ⁶⁰74, wherein the fastening part includes a screw passing through at least one hole. --

⁶²
--76. The method according to claim ⁵⁴44, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.--

⁶³
--77. The method according to claim ⁵⁴44, wherein the fastening part includes an adhesive material.--
